

VCEMS Training Bulletin

Bulletin 060
Date: April 30, 2024

Adventist Health Simi Valley OB Services

Beginning May 1, 2024 AHSV will no longer have OB Services at their hospital.

Please follow the **Additional Information** listed in: **Policy 705.10**

Ventura County EMS
County Wide Protocols

Policy 705.10

Childbirth			
BLS Procedures			
Determine <ul style="list-style-type: none"> Number of pregnancies (gravidas) Number of deliveries (para) Due date (weeks of gestation) Onset/duration/frequency/intensity of contractions If a rupture of membranes has occurred (including color/date/time) If any expected complications during pregnancy are present Presence of crowning or any abnormal presenting part at perineum 			
PROLAPSED CORD Cover cord with wet saline dressing Place mother in left-lateral Trendelenberg position Provide constant manual pressure on presenting part to avoid cord compression Initiate Code-3 transport if there is partial delivery of the infant and no further progress after 1-2 minutes		OTHER PRESENTING PART DELIVERING Elevate hips Assist delivery while initiating Code-3 transport Assist with breech delivery while supporting the infant's body (covering to maintain body warmth)	
NOT DELIVERING Place mother in left-lateral Trendelenberg position Initiate Code-3 transport			
If the HEAD is crowning, prepare to assist mother with delivery - Guide baby out ONLY IF SECRECTIONS, INCLUDING MECONIUM, CAUSE AIRWAY OBSTRUCTION: suction mouth, then nose Dry and stimulate (rub gently, but briskly with warm towel, provide stocking cap if available) While drying infant, assess for prematurity, poor respiratory effort, or lack of muscle tone. If any exist, double clamp and cut cord, and begin resuscitation according to VC EMS Policy 705.16, "Neonatal Resuscitation" Place infant skin-to-skin with mother, cover both with dry linen, and observe for breathing, activity, and color Double clamp cord and cut with sterile scissors between clamps Note time of birth Begin transport. To help prevent heat loss from infant, turn up the heat in the treatment area of the ambulance <ul style="list-style-type: none"> Do not wait for placenta to deliver If placenta delivers, assist and package; then gently massage fundus Do not massage fundus until the placenta has delivered Newborn assessment - at 1 minute and 5 minutes post-delivery (Note: if infant requires resuscitation at birth, defer APGAR scoring to a later time. Resuscitation should not be delayed to assess for APGAR score)			
APGAR score			
	0	1	2
A - Appearance	Blue/pale	Pink w/ blue extremities	Pink
P - Pulse	Absent	< 100 bpm	> 100 bpm
G - Grimace (reflex irritability)	Absent	Grimace	Cough/Cry/Sneeze
A - Activity (muscle tone)	Limp	Some flexion	Active
R - Respiration	Absent	Slow	Good cry
ALS Standing Orders			
Base Hospital Orders Only			
Additional Information • If a patient is in an area where the most accessible hospital does not have obstetric services, consult with the Base Hospital for destination determination.			

Effective Date: December 1, 2017 | Date Revised: September 14, 2017
 Next Review Date: May 31, 2022 | Last Reviewed: May 13, 2020

DZ S/MO
VCEMS Medical Director

Additional Information

- If a patient is in an area where the most accessible hospital does not have obstetric services, consult with the Base Hospital for destination determination.

There are circumstances where transport to the most accessible Emergency Department for patient stabilization may take precedence (ie. hemodynamically unstable, airway complications, cardiac arrest, complicated childbirth, etc).

Policy 400 has been updated to reflect that Obstetric Services are not offered at AHSV, OVCH or SJHC

Thank you!
