Monkeypox Vaccination Eligibility*
In alignment with CDPH and CDC guidelines

- Men who have sex with men (MSM) with multiple sex partners (group sex) including saunas, bathhouses, sex clubs
- MSM who have anonymous sex
- MSM who have “chemsex” (using drugs as part of their sex life/activity)
- MSM who engage in “survival and/or transactional sex” (sex for money, food, etc.)
- MSM with a diagnosis of Chlamydia, Gonorrhea, or Syphilis infection in the last 12 months.
- Anyone on HIV PrEP
- HIV+ individuals who engage in any of the above activities
- HIV+ individuals with CD4 cell counts less than 200 with high-risk behaviors
- Women who engage in any of the above activities with men
- Laboratory workers who deal with monkeypox specimens
- Workers who perform repeated sample collection in clinical settings

*This list will become less restrictive as vaccine supply increases.
